

A fancy title for your assignment

Subtitle/Subject

Harshvardhan

2016IPM043

Section - 'A'

ASSIGNMENT

Instructor's Name: Prof. John Doe

Course: Social Psychology in Business Environments

Date of Submission: August 22, 2018

Hey, this is a template for assignment submissions at college. Don't try to make sense of the text in the document, they're copy-paste of my other assignments and are completely out of context. Edit it as you need and have fun!

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper.

Definition

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper.

1 Background and Introduction

The effect is usually accompanied with,

- First item
- Second item
- Extend this list

Examples

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper.

Some real life examples of this effect are following,

1. First item
2. Second item
3. More items

Festinger and Carlsmith (1959) gave an interesting account about forced compliance. You can also cite this paper in-paragraph. (Festinger and Carlsmith, 1959)

2 Mathematical Tools and Computer Codes

2.1 Some symbols $\theta_k = -\beta^{\alpha_k} \rho_k$

Another possible parametrisation is $\theta_k = \beta^{\alpha_k} \rho_k$. The correlation function then used is,

$$\text{cov}(z(x_i), z(x_j)) = \frac{1}{\Gamma(\nu)} \sum_{k=1}^p \rho_k^{2^\alpha |x_{ij} - x_{jk}|_k^\alpha}.$$

Euclidean Distance. It is defined as,

$$d_0 = \sqrt{\sum_{j=1}^n (x_i - y_i)^2},$$

where x_i and y_i refer to different observations of Variable i where there are n variables.

2.2 Computer Codes

```
library(factoextra)
fviz_cluster(list(data = x, cluster = sub))

#developing tanglegram - comparative tanglegram between average linkages for
correlation and euclidean distances
library("dendextend")
hc1=hc.average
d1=as.dendrogram (hc)
d2=as.dendrogram (hc1)

tanglegram(d1, d2)
```

2.3 Using matrices

It can also be written as

$$MSE(\hat{y}(x)) = \sigma^2 \left[1 - (f'(x)r'(x)) \begin{pmatrix} 0 & F' \\ F & R \end{pmatrix}^{-1} \right].$$

3 Tables and Images

Here is a table,

Attribute	Explanation	Type
FRESH	Annual Spending on Fresh Products	Continuous
MILK	Annual Spending on Milk Products	Continuous
GROCERY	Annual Spending on Grocery Products	Continuous
FROZEN	Annual Spending on Frozen Products	Continuous
DETERGENTS	Annual Spending on Detergent	Continuous
DELICATESSEN	Annual Spending on delicatessen products	Continuous
CHANNEL	Hotel/Restaurant/Cafe	Nominal
REGION	Region (Lisbon, Oporto or Other)	Nominal

Here is an image.

Fig. 1: Cluster Plot for the clusters obtained.
